

OWC One-Way Cylinder

How it Works

Mul-T-Lock's One Way Cylinder Concept provides enhanced user control by offering a cylinder that can have up to three different operating keys, each one designated to perform its own allowed function. Offering one key that can only lock the cylinder and/or one key that can only unlock the cylinder, and one key that can perform both functions.

Advantages

- Keys with limited functions can be distributed according to each keyholder's need
- User friendly and easy to install
- Fully mechanical
- No complex software or expensive electronics
- Effective and reliable

Features

- Available in Mul-T-Lock's telescopic pin platforms, Classic, Interactive and MT5+
- Suitable for padlocks and cylinders of any length
- Not recommended for use in master key systems

Suggested applications

- Offices, Laboratories, Institutions, Retail Locations
- Designating "unlock only" keys to those whose purpose is only entry
- Designating "lock only" keys to those whose purpose is to close
- Designating "lock and unlock" keys to those who are authorized to perform both
