

TLO

Temporary Lock-Out Cylinder

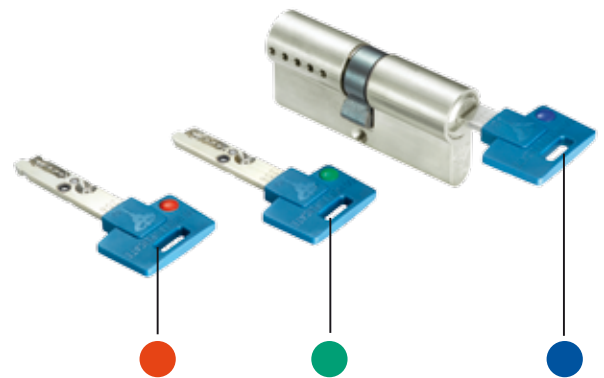

TLO

MUL-T-LOCK®

Mul-T-Lock's TLO (Temporary Lock-Out) cylinder offers effective and reliable access/entrance control, without resorting to complex software and expensive electronic systems. Fully mechanical, user-friendly and easy to install, the TLO is based on an innovative concept and three keys:

A blue key for ordinary use; a red lockout key, which, when turned in the cylinder, makes the door inaccessible to all blue keys; and a green reversal key, which reverses the red key's effect, making the door accessible once more to regular blue keys.

Advantages:

- ▶ User has full control of access to premises, determining exactly when, and for how long, access is prevented/renewed
- ▶ No need to replace the cylinder or collect all keys to prevent access
- ▶ Access may be restored at the turn of a (green) key
- ▶ User friendly and easy to install
- ▶ Fully mechanical
- ▶ No complex software or expensive electronics
- ▶ Effective and reliable

Features:

- ▶ Available in Mul-T-Lock's telescopic pin platforms, Classic and Interactive®
- ▶ Suitable for cylinders of any length
- ▶ Supplied with 3 duplication key cards, one for each key
- ▶ Compatible only with cylinders that allow full 360 degrees key rotation (Can be adjusted for other options)
- ▶ Not recommended for use in master key systems

Suggested applications:

- ▶ Making your home inaccessible to service persons (housemaid, postman etc.) over the weekend
- ▶ Making a shop inaccessible to employees over the weekend
- ▶ Making a storeroom inaccessible to company employees when sensitive equipment is in storage
